

This is the proven **Ciclo-Blade**
made of hard metal alloy and shaped to give
unmatched cutting performance.

It is the heart of the

Ciclo®-Circular Cutter

**suitable for cutting flat gasket
up to 12 mm thickness.**

A gasket to meet your requirements instantly.

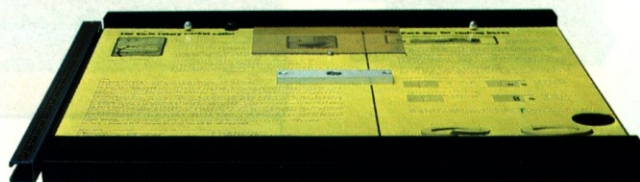

Take the Ciclo from the wall,
place it on the work bench or preferably
clamp it into a bench vice.

Place the gasket material on the
cutting surface, set the cutting radius
and rotate the cutter.

**It is the easiest way to produce
a gasket!**

On the back of the Ciclo we have
included many useful tips on
maintenance.

The Ciclo pay-back time is very short, it saves you money as even
the smallest remnant
piece of gasket
material can be utilized.

Ciclo-Standard
from centre 30– 500 mm Ø
from corner 500–1000 mm Ø

Ciclo-Junior
from centre 30–270 mm Ø
from corner 270–500 mm Ø
